# COLOR CODES FOR DISTRICT EVALUATIONS

April 1978

Building	Color	Integrity	Architectural Significance	Historical Significance
<b>PIVOTAL BUILDING</b> An intact building which has special visual merit or historical importance. Probably qualifies for listing as a single building.	Red	Exterior integrity excellent. Retains historic appearance except for minor details.	Has special architectural significance due to style, size, rarity of design or rarity of building type.	Has special historical significance due to age, association with important person or events.
<b>MATRIX BUILDING</b> A good vernacular building which retains an historic appearance.	Green	Exterior integrity good Minor alterations are permissible	Has architectural significance as part of a grouping of vernacular buildings. Retains architectural detail.	Has historical value as a contributor to the general area development.
<b>FILLER BUILDING</b> An old building which has had unsuitable alterations or sidings added.	Yellow	Exterior integrity poor but potentially reversible	Architectural significance diminished by loss of detail and use of modern materials which detract. Historic origin still recognizable.	Has some historical value as remnant of the area history of development.
<b>INTRUSION</b> A building of any age which detracts from the historic environment.	Blue		Lacking in architectural distinction. Intrudes upon the visual character of the streetscape as a disruptive element.	No historic value.
<b>MODERN BUILDING</b> Usually less than 50 years old. A recent building which does not detract.	Brown		Compatible in scale and materials with the historic environment. May have architectural distinction.	No historic value
<b>PARKING LOT</b>	Cross Hatch

# COLOR CODES FOR DISTRICT EVALUATIONS

April 1978

Building	Color	Integrity	Architectural Significance	Historical Significance
<b>PIVOTAL BUILDING</b> An intact building which has special visual merit or historical importance. Probably qualifies for listing as a single building.	Red	Exterior integrity excellent.  Retains historic appearance except for minor details.	Has special architectural significance due to style, size, rarity of design or rarity of building type.	Has special historical significance due to age, association with important person, or events.
<b>MATRIX BUILDING</b> A good vernacular building which retains an historic appearance.	Green	Exterior integrity good  Minor alterations are permissible	Has architectural significance as part of a grouping of vernacular buildings.  Retains architectural detail.	Has historical value as a contributor to the general area development.
<b>FILLER BUILDING</b> An old building which has had unsuitable alterations or sidings added.	Yellow	Exterior integrity poor but potentially reversible	Architectural significance diminished by loss of detail and use of modern materials which detract. Historic origin still recognizable.	Has some historical value as remnant of the area history of development.
<b>INTRUSION</b> A building of any age which detracts from the historic environment.	Blue		Lacking in architectural distinction. Intrudes upon the visual character of the streetscape as a disruptive element.	No historic value.
<b>MODERN BUILDING</b> Usually less than 50 years old. A recent building which does not detract.	Brown		Compatible in scale and materials with the historic environment. May have architectural distinction.	No historic value

20. The First Baptist Church was organized on April 3, 1822 after efforts of John A. Lazell, an immigrant to Buffalo to obtain Baptist preaching had resulted in the donation by the lot for a Baptist Society. In 1922 the Congregation celebrated the church's centennial. Among the daughter churches of the First Baptist are the Michigan Avenue Church, organized 1836; Niagara Square Congregational, 1849 First German Baptist and Cedar Street Baptist 1859; Prospect Avenue 1868 and Dearborn Street and Delaware Avenue Churches, 1882

22. **THEMATIC**

**Commercial-Second Empire Richardson Romanesque**

20. Fine example of Second Empire Style. Built by Solomon Drullard in 1862 as a private residence. In 1890's a wing addition was constructed which adjoined the 564 building with Richardson-fashioned expansion facility at its rear. Housed St. Margarets School, a private institution (1884-1914). This total complex, along with 556 Franklin Street and Carriage house, then served as St. Mary's Seminary, a school for girls from 1915-1972. The building then housed the New School for Performing Arts, Inc. (1973-1975). In 1975 after a period of non-use and before the total site was to be razed it was purchased for preservation and development

## THEODORE ROOSEVELT INAUGURAL NATIONAL HISTORIC SITE

641 Delaware Avenue

The land on which the Ansley Wilcox house stands was once part of the Holland Land Company grants. Wilhelm Willink, a holland Land Company agent, is the first name to appear on the abstract title. On March 1, 1809 the title was conveyed to Ebenezer Walden. In 1838, during strained relations between Canada and the United States, three companies of United States Artillery were garrisoned on the site. Walden's land was leased and a post, Poinsett Barracks was erected. A row of officer's quarters facing the parade ground was a prominent part of the post. The front portion of the Wilcox house was part of this row, and until the abandonment of the barracks, this two-family structure housed the commanding officer and the post surgeon. Some prominent officers who served and in all probability frequented the post; included John C. Pemberton, John Sedgwick and Jefferson Davis.

When Poinsett Barracks was abandoned in the late 1840's the house passed into private ownership and was remodeled by architect Thomas Tilden. A prominent Buffalo judge, Joseph G. Masten, was its first private owner. In 1883 Dexter P. Rumsey purchased the house and gave it to the Ansley Wilcoxes. Previous owners had by this time built a frame addition at the rear of the building, and a brick coach house nearby. By 1901 Wilcox had further improved the property. The remodeling done by architect George Cary, did not effect the interior of the original part, except of the two first floor parlors which were made into a large library. The house was transformed into a stately mansion, flavored with both Greek Revival and Adamesque styles, and seasoned with the eclecticism of the nineteenth century.

On September 14, 1901, in the library Theodore Roosevelt became the 26th President of the United States. President William McKinley had been shot and critically wounded on September 6th while attending Pan American Exposition. President Roosevelt was called back from a family vacation in the Adirondacks upon McKinley's death on the 13th of September. On the next day 3:15 Saturday, standing before Judge R. Hazel of the United States District Court, Theodore Roosevelt took the oath of office.

The Wilcoxes lived in the house until the early 1930's. House was sold for use as a restaurant. In the 1970 the house was restored and opened to the public September 14, 1971, the 70th anniversary of the inauguration.

Historical Notes on the Twentieth Century Club by Carrie Moot

THEME: Italian Renaissance

20. Unique house in city because of styling combination. The original owner was John L. Eckel, who was born in Perryburg, Ohio, April 28, 1880. He received pre-medical schooling at the University of Michigan. In 1907 he graduated from the University of Buffalo medical school. From 1909-1911 he worked at the Buffalo State Hospital serving as assistant junior to the assistant senior physician. In 1911, Dr. Eckel entered the University of Berlin to study under Oppenheim, Ziehen, and Jacobson who were specialists in nervous and mental diseases. He also attended the University of Munich under Professor Alzheimer from the University of London, Queen's Square Hospital for Nervous and Mental Diseases. In 1913 he returned to Buffalo and began private practice and was appointed to associate professor of psychiatry at the University of Buffalo, a post he held until his death. He was attending and consulting neurologist and psychiatrist at Buffalo General, Millard Fillmore, Memorial, Mercy, Our Lady of Victory, and Sisters Hospitals. During World War I he served as medical officer in the US Army here and in Washington. He was author of more than forty research articles published in medical journals, including those of London, Berlin and Vienna.

TWENTIETH CENTURY CLUB  
595 Delaware Ave.

The Twentieth Century Club was the first club run by women and for women in the United States. It was Buffalo's first women's club. The club was founded in 1894 to develop a club rich in tradition, education and culture. Wednesday morning lectures given by prominent citizens were planned. The club was an extension of the Graduate Association of the Buffalo Seminary at 95 Johnson Park. The new club bought the Delaware Avenue Baptist Church at their present location and spent about \$8,000 to have remodeled. In November 1896 the clubhouse, in Italian Renaissance Style, by Green and Wicks was completed in front of the church.

Among the well-known persons entertained at the Club were Wu Ting Fang, minister from China, Mr. and Mrs. Booker T. Washington and Governor and Mrs. Odell. In May 1901 the third floor of the building was rented to the Buffalo Seminary and was used for school purposes until June 1905.

In 1905 the church was replaced by a 92X59 foot French Renaissance ballroom, a stage and dressing rooms, and later a gymnasium and swimming pool were built beneath the ballrooms. On 7/17/1923 a fire destroyed the ballroom and part of the gymnasium, which were rebuilt the following year. A garden committee was appointed in 1925 to landscape the grounds behind the clubhouse on land purchased in 1919. The present clubhouse has such features as the 35 foot square second floor court with a leaded glass skylight above it, murals by Mrs. Glenny representing the seven ages of women, and a 30X30 foot royal red rug designed by Mrs. Glenny. The present rug is a duplication made in 1956 of the original. In the first floor landing hangs a portrait of Miss Charlotte Mulligan, founder and first president of the Twentieth Century Club, painted by Mrs. Charles Cary.

THE LENOX APARTMENT HOUSE.

## A MODEL BUILDING.

### The Lenox Apartment House for North Street.

It Will be, Eight Stories High and an  
Ornate Structure Complete  
in its Details.

The Lenox Corporation, the members of which are Messrs. Irving E. Waters, Clark L. Ingham, Edward C. Mason, James B. Baynes, Albert L. Williams, and Andrew F. West, recently closed contracts for the erection of the apartment house illustrated in the Courier to-day.

The lot upon which the Lenox is to be built is on the south side of North Street, just west of Delaware Avenue. It has a frontage of 157 feet. The building frontage will be 130 feet. The design is for eight stories, steel skeleton frame, fire-proof construction, with porous terra cotta arches and partitions.

The style chosen is a free adaptation of Venetian Gothic. The first two stories are to be of washed brick and terra cotta; the upper stories of buff brick and terra cotta, trimmed with a pattern of darker brick. The cornice and cresting will be

in harmony with the general style. The front will be divided into two wings by a recessed court, 40 feet wide, and a corresponding court in the rear will make the rooms facing into it as pleasant as though situated at the front.

The entrance will be made through a loggia of terra cotta, richly modeled, the design as indicated on the perspective drawing, and with mosaic floor and stucco ceilings; thence up a flight of steps in the vestibule into the reception hall. This hall is to be finished in marble with mosaic floor and stucco ornaments and ceilings, decorated in colors. From the hall will open the reception room, writing room, and from each side the wide halls leading to the elevators and staircases. The passenger elevators will be enclosed in electro-bronze screens and will have electro-bronze cases. The staircases will be broad, easy, and handsome, and made of wrought iron, with marble treads and broad platform.

The building will be divided into house-keeping flats and apartments. The flats will consist of a vestibule so placed that from it all parts of the flat may be reached without passing through the rooms. Each flat will include reception room, library, dining room, three to five chambers, servants' room, butlery, kitchen, bath room, and closets, cases of drawers, china closets, kitchen dressers, store rooms, servants' toilet rooms, etc. The library and dining room are to be provided with fire-places. The apartments will consist of from two to six rooms and a bath. In the

rear of each wing will be placed a lift of large size and great strength. On the eighth floor will be a cafe with serving rooms and kitchen, as well as private dining rooms, a lounging room and a ladies' parlor. The cafe will have a high cored ceiling and elaborate decorations. The rear of the building is to be carried up to nine stories. In the ninth floor will be fitted additional servants' rooms.

The finish of the interior will be in hard wood with oak floors. The dining rooms lighted with a row of broad casement windows fitted up with a seat. There will be a high paneled wainscoting in the dining rooms, of quartered white oak. The fire-places will be opposite the windows and will have mantels of artistic designs.

The bath rooms are to have mosaic floors and tile wainscoting, and will be large and well lighted. The plumbing will be of the best and the fixtures of the bath room of new and expensive design. All the hardware for the building will be specially designed by the architects.

The heating of the building will be of a system that will insure pure air, heated to any desired temperature.

A number of lockers will be fitted up in the basement for storage purposes for the tenants.

The boilers, engine, dynamos, and all other apparatus will be placed in a separate building in the rear, securing immunity from heat and noise.

The architects of the building are Lorvin & Whelan, successors to F. E. Lorvin.

The contract for the entire building has been let to George Duchacherer.

99-20

20.

Unique Style apartment building. Its rich ornamentation reflects Venetian-Gothic type architecture. Built as fashionable residential hotel for the Pan-American Exposition. Constructed on the site of the Old North Street Cemetery, which once covered the entire block along North Street from Irving Place to Delaware and south midway to Allen Street. The Lenox cost \$400,000 to construct. It originally contained fifty apartments renting from \$420 to \$1, 600 per year.

(Indicate if building or structure is in an historic district)

**Within local and proposed National Register Allentown Preservation Districts. Allen Street, Irving to Park contains original flagstone walks. "Tift Houses" are the most consistent street-scapes in Allentown.**

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

**Two story Italianate Style. Gable roof. Georgian Styled door, wood paneled with sidelights and sectioned fanlight. Round arched windows, double hung with four over four lights. Gable has round arched windows. Paired Italianate brackets.**

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION: c. 1878

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**Fine example of Italianate Style building. Twentieth century Georgian Style door integrates nicely with original composition. One of the seven houses built by William Tifts on Allen Street between Park and Irving Place. This house along with 153 Allen, was built later than the other five. Locally known as "Tifts Houses". William Tifts also built houses at 121, 123 College Street and 118-124 Mariner. House has been converted into apartments.**

(Indicate if building or structure is in an historic district)

**Within local and proposed National Register Alletown Preservation Districts. Among finely styled residences of upper Park Street.**

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

**Two story Italianate Style. Gable roof. Paired pendant scroll brackets under eaves. Round arched second floor windows with upper sashes having interlaced mullions and segmental arch hood molding. First floor segmental arched windows with upper sashes having round arched lights segmental arch hood molding. Front entranceway porch has pediment roof with scroll relief carving in tympanum, squared posts and lattice work in sides. Front door has segmental arched**

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION:

**c. 1870**

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**18 cont'd head, medallions, pilasters and leaded glass sidelights. Exterior chimney on south side. Recessed porch on south side near back.**

**20. One of a few small Italianate Style frame houses with fine detailing especially noted in windows. The original owner was CH Heeb and an A. Glass lived there in 1884. It was built by the Finley family which built two other houses on the street. It was once the home of H. Montgomery Cerrada, the manager of the Iroquois Hotel, once Buffalo's finest hotel opened in 1889 but he moved his family to an outside residence when a baby was to be born. Two rear additions have been added to the original house. Mr. and Mrs. Franklin E. Morgan bought the house in 1958.**

17. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:  
(Indicate if building or structure is in an historic district)  
Within local and proposed National Register Allentown Preservation Districts. Among Victorian homes and apartment buildings. North Street originally was the route of the Old Guide Board Road, an early wagon trail of the Niagara Frontier.
18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):  
Two story Neoclassical Style building. Gable roof. Free standing portico has Greek Ionic columns. Monumental entablature with pediment. Egg and dart molding under cornice. Large wood double doors flanked by pilaster strips. Transom with tracery. Second floor windows under portico flat headed with tracery. Rear pediment contains segmental window. Sides contain tall flat headed windows flanked by pilaster strips.
19. DATE OF INITIAL CONSTRUCTION: \_\_\_\_\_  
c. 1910
- ARCHITECT: \_\_\_\_\_
- BUILDER: \_\_\_\_\_
20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:  
Fine example of Neoclassical Style building. The twentieth century showed interest in modern adaptations of Egyptian, Greek and Roman Empire Styles. Institutions favored the traditional and monumental character which such ancient forms lent to their new facilities. Commercial interests exploited the style to such a large degree it became known as "Bank Classic". Originally the site of the Mary Warren residence.

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**Decorated with festoons and medallions.**

**20. Typical apartment building built after the turn of the century. Originally part of a double house located at 198 North Street. Original owner was George Sicard, a prominent attorney at the time. After the Sicards came the Howard Pughman family, who lived there for some years before moving to the corner of North and Park Streets. Then James Cary Evans and family lived there until Mr. Evans purchased the Cady home further down the street toward the Circle. Grace Seale was the last owner of the house, after which it was torn down for the present apartment building. Steel frame, and brick and tile walls and concrete floor and roof.**

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION: **c. 1888**

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**Unique Style house due to the combination of two contrasting styles. Built for the membership of the Buffalo Bicycle Club. In 1896 the club was renamed the LaSalle Club, activities diversified and rear auditorium became the scene for dances and socials. In 1905 the club-house became the residence and studio of Buffalo's most talented women's couturier, Madame Eggert. She kept only a select clientele, as expensive Parisian materials and fashions were her special trade. Now divided into apartments. Present porch is a later addition.**

19. DATE OF INITIAL CONSTRUCTION: **c. 1878**

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**Typical building with Italianate influence. Original owner was Citerly. In 1668, Arlington Park was christened Wadsworth Park after James Wadsworth, Mayor of Buffalo in 1851 and residential land developer in Allentown area. In 1885 its name was changed to Arlington park. The south side of park was built much earlier than the north side, north being the back gardens of large North Street residences until twentieth century.**

**Within local and proposed National Register Allentown Preservation Districts. Among fine residential houses of Arlington, one two residential greens in Allentown, redesigned by FL Olmstead.**

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

**Two story Gothic Revival Style. Steep pitch gable roof. Curvilinear vergeboard along front eaves. Tripart window on first floor and second floor with label molding. Gabled dormer in south gable. Exterior chimney in south gable. Front Eastlake Style porch has pediment over steps with elaborate foliate cut out pattern spool frieze, turned posts with foliate cut out brackets, stick design in balustrade, ball and dart cut out pattern in porch base.**

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION:

**c. 1867**

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**18 cont'd Front entrance on side has label molding, wood paneled double doors with round arched lights and two light transoms.**

**20. Unique and outstanding example of Gothic Revival Style architecture in Buffalo The Eastlake Style porch has probably added in the 1880's. Jane Heath owned it in 1870 and she also owned 58 Arlington Park. The rear section is a later addition. There are few examples of Board and Batten construction in Buffalo and most are barns. The original owner, Richard Heath was a stableskeeper.**

Tympanum contains wood Ogee arches, quatrefoil and trefoil tracery and stain glass windows, crennelated parapet over main entrance. Second story pedimented facade contains Gothic arched stained glass window with intersecting tracery and eyebrow window head. Crennelated towers flank ends of building. Gothic

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION:

c. 1904

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

18 cont'd arched stain, glass windows on nave sides. Buttressing. Peak of gable 75'.

20. Fine example of English Gothic styled church found in Buffalo Holy Trinity was founded on May 5, 1879 when a group of 28 persons gathered in the old French Protestant Church at Ellicott and Tupper and formed the first English Lutheran Church in the city. In 1958 the Mansperger Chapel addition was built on the south side of the church at a cost of about \$200,000. In 1967 the Henrich Bell Tower was constructed at the cost of \$30,000. The property in the rear of the church, 33 Linwood is the site of an 88 unit apartment building for senior citizens, built by the church in 1970.

20. Excellent example of the Georgian Revival Style. Delaware Ave. became Buffalo's most prestigious street in the late 19th century with many large residences being built in the street until the 1920's. Since then many of the houses have been torn down for office and apartment buildings, while others have been adapted for institutional and commercial use.

(see attached sheet.)

Residential-Georgian Revival

20. cont'd One of four remaining mansions that were built by McKim, Mead and White in Buffalo. Three are still standing with all of them being next to each other on the northwest corner of Delaware and North. They include the Metcalfe House, Butler Mansion and the Pratt House. The fourth house was on the southwest corner of Delaware and North and was torn down for a Howard Johnsons.

NOTES ON THE PRATT HOUSE AT 690 DELAWARE AVENUE

The Pratt House at 690 Delaware was built by Charles Williams, a banker and real estate developer, at the turn of the century. Charles Williams was a brother of George Williams, the man who built the Butler Mansion directly south of it. The house was designed by Stanford White of the famous architectural firm of McKim, Mead & White. It is in the classic Georgian style of brick with wood trim, and has a circular entablature over the front entrance supported by six slender stone columns.

Mrs. Frederick L. Pratt, Mr. Williams' daughter, lived there with her husband after her father's death, and was well known for her charity. For a number of years she was president of the Children's Hospital on Bryant Street. Her aunt, Miss Williams, was one of the founders of the hospital, and Mrs. Pratt carried on the tradition, contributing a great deal to its growth.

Many distinguished guests dined there including a Georgia governor and his wife, and Judge and Mrs. Louis B. Hart of Buffalo. Secretary of State Frank B. Kellogg was guest there and was entertained by Mrs. Pratt at the time when the Peace Bridge was dedicated.

In the 1920's, Mrs. Pratt engaged Jansen of Paris to redecorate the two formal rooms in the front of her home. The Jansen firm is the same one that Jacqueline Kennedy employed to redo the Oval Room and the Red Room in the White House when she was the First Lady.

These two rooms in the Pratt House are interesting for their unusual character. The first, known as The Gold Room, is directly to the left on entering the front of the house. It is designed in the rococo style of Louis XV of France, and above the doorway are insets of grisaille. These are painted panels representing stone work so that at a distance they give the impression of marble figures in a Watteau or Fragonard painting. The fireplace is faced with white marble and flanked by crystal fixtures. Rich, seductive, and feminine, the room suggests one of the ante-rooms in the Grand Trianon at Versailles.

The second room, to the right of the entrance, is a library in the First empire style. It is quite the opposite in feeling from the Gold Room, being masculine and sombre like its inspiration, Napoleon. Napoleon's favorite color, green, is in the marble facing the fireplace giving it the appearance of dark jade.

The whole house is stately and historic. The long drawing room across the front of the house is dignified by beams of dark walnut, and it is paneled in mahogany. The huge fireplace dominating one wall is carved of stone in the Italian Renaissance fashion.

(Indicate if building or structure is in an historic district)

Within Delaware Preservation District. Among prestigious residences adapted to house business offices, apartment buildings and modern commercial buildings on Delaware Avenue.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

English Romanesque Style church, gable roof. Polygonal central tower has round arched entrances. Double wood carved doors, stain glass tympanum. Molding surround. Over first floor is shed roof with engaged arcade and corbeling below. Stepped buttressing. Second floor has round arched stain glass window. Third floor center window with engaged arcade panel below. Sides have round arched stain glass windows. Fourth floor has round arched louvre windows with dentils and engaged arcade above. Crennelated parapet. Tent roof steeple has decorative shingles. Crocket

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION:

c. 1858

ARCHITECT: A. M. Wilcox

→ addn by S. Merrell Clement

BUILDER: Henry Rumrill

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

18 cont'd. Topping steeple. Side aisles on front facade have round arched stain glass windows with Romanesque tracery. Stone eyebrow window head. End polygonal spires have buttressing. Crocket topping. Dentils and modillions under roof eave. Sides have large round arched stain glass windows, right side has pastors entrance with gabled porch. Square supports and brackets. Stick work in tympanum. Bargeboard with scalloped edge. Segmental arched entrance has leaded doors and transom.

20. Excellent example of a Romanesque Style church. The parish house was organized in 1854. Brick addition including a kitchen and Westminster Hall built c. 1920. Delaware Ave. became the city most prestigious street in the late 19th century, thus many of the city's largest residences can be found on this street.

A Short History of Westminster Church  
724 Delaware Avenue

Jesse Ketchum, who was a tanner, came to Buffalo in 1845. He purchased a lot on North Street for his home when North Street at Delaware Avenue was the boundary between Buffalo and Black Rock. He then bought frontage on Delaware Avenue with the hope of building a church and Sunday School there. The hope was deferred for a time, but an organization of trustees and interested people was formed and the name Westminster Society was given to it. The purpose of the Society was to plan for building the church.

The name Westminster is of sound ecclesiastical origin. It was derived from the Westminster Assembly, a Church Court authorized by the Long Parliament in London in the reign of King Charles I. The Assembly sat in the Borough of Westminster in London from 1643-1649 for the purpose of agreeing on Articles of Faith and a Constitution of Government for the Presbyterian Church. These were Puritan divines who were in defiance of King Charles and Archbishop Laud of the Church of England. The Westminster Confession of Faith has come down through history practically unchanged from that ancient assembly.

Finally, in 1858, the building of the present church was begun. A.M. Wilcox was the architect, and Henry Rumrill was the master mason. The total cost of the building was \$19,200, and this included the erection of a two story chapel in the rear.

The corner stone was laid in August of that year. Deposited in a box underneath it were seventeen articles including the following:

1. Minutes of the General Assembly of the Presbyterian Church
2. A history of Westminster Church and a catalogue of its officers and members
3. Names of the architect, contractors, and laborers
4. A biographical sketch of Jesse Ketchum
5. Copies of daily and weekly editions of the Courier and the Buffalo Express

6. The Ulster County Gazette. (Ulster County in Northern Ireland was where Jesse Ketchum was born). The Gazette was dated January, 1800. This issue contained an account of the death of George Washington.

7. A New York Times containing a complete account of the laying of the Atlantic Cable; a section of the Atlantic Cable with a specimen of the telegraphic alphabet by Morse...this contributed by Samuel Porter

9) The bell from the original chapel marked A.G. Buffalo, 1850 (Adam Goode Brass and Bell Foundry on Ohio Street near Washington) was hoisted into the two hundred foot steeple where it hangs today.

In 1902 the interior of the church was redecorated by Tiffany. The redecoration included the church windows and the electroliers.

In 1931 the first stained glass window was put in the church. The window was contributed by the Richmond family.

During the general movement to the suburbs after World War II by many churches which took them out of the downtown section of the city, Westminster resisted this change. The decision was to accept its duty to its congregation in the city and to be present to watch over its mission work in the inner city.

It stands on Delaware Avenue today, One hundred eighteen years old, and is a testament of faith to its founders and an inspiration to all who worship in it. Above all the trees that surround it, the steeple soars...

Mid all the traffic of the ways...  
Like a finger pointing to the sky

**SIGNIFICANCE**

19. DATE OF INITIAL CONSTRUCTION: 1884

ARCHITECT: McKim, Meade, and White

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

18 con'd. on east side has shingled second floor and squared stone columns with triglyphs and metopes. Front porch has polygonal roof, ionic tuscan columns and is glass enclosed. West side has stone courses on first and second floors, oval window near front, shingles on second floor bay with scroll brackets under corners, and first floor bay near rear with shingle siding and multi-light sashes.

20. See attached sheets.

21. SOURCES: Vol. II H. Perry Smith's, History of the City of Buffalo  
Buffalo Address Book, 1885, 1904 Buffalo City Directory 1885  
Buffalo City Atlas 1891, 1925

22. THEME. Residential- Shingle Style - McKim, Mead, and White

20. One of three remaining houses at the North and Delaware street corner designed by McKim, Meade and White. The fourth, which stood at the southwest corner of the intersection, was torn down to build a Howard Johnson's Restaurant. 125 North Street is the earliest of the houses and is designed in the Shingle style which at the time was termed a modernized Colonial Revival. Mrs. Erzelia T. Metcalfe lived here from 1885 to 1904 along with Dr. Francis T. Metcalfe and George S. Metcalfe. The house was converted to a rooming house in the 1920's and was used as such until 1979 when it was sold to the Latowbin Corp..

"The house was originally commissioned in July 1882, and was completed by March 17, 1884 when the final bills were paid. The house itself cost \$17,756.79 and the special interior work cost \$5706.92. On top of this, the architects were paid a commission. The architect incharge was probably Stanford White.

The house is very important in the development of McKim, Mead and White's work for it is an illustration of their attempt to move away from the informal shingle style towards a more evocative image. Some critics have criticized the house as not being enough of a "shingle style" building, but I think that indicates a basic misunderstanding of the direction of their work. At the time, The Buffalo Real Estate & Builders Monthly, (January, 1886) p. 3, noted "the style might be called a somewhat conventionalized 'early colonial.'" The article goes onto speak of the early colonial style, and concludes: "It is substantial, and plain almost to homeliness; the long, steep pitch of its red tiled roof suggesting ample provision made against the rigors of a northern winter." At about the same time George William Sheldon in ARTISTIC COUNTRY SEATS (1886-87), a lavish volume of major architectural designs from the period, notes the house was a superb example of the new individuality in American architecture and signpost of the future. Then in 1895 Russell Sturgis writing in GREAT AMERICAN ARCHITECTS for The Architectural Record highly praised the house for its "spontaneous" appearance.

The house for its time was recognized as being of major importance, and I think it should be so recognized. It falls between McKim, Mead and White's less academic earlier works and the more formal later stuff such as the Williams houses. The interior woodwork is of special importance."<sup>1</sup>

17. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:

(Indicate if building or structure is in an historic district)

Among prestigious residences adapted for businesses and 20th century commercial buildings on Delaware Ave. A Howard Johnson's restaurant is located to the south. Located in Delaware Ave. Preservation District, which is a National Register District.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

Three story Second Renaissance Revival Style. Flat roof. Monumental front portico has fluted corinthian columns that support entablature with dentils under crowning cornice. Third floor balcony has balustrade with decorative cast iron panels. First floor glass enclosed entrance porch with cast iron grill work and second floor cast iron balcony. Entrance flanked by Ionic pilaster strips and round arched single light windows with transom bar and fan design in

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION

Built 1894

ARCHITECT: McKim Mead and White

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

18 cont'd on attached sheet.

20. One of four residences that were built by the firm of McKim Mead and White in Buffalo. Three of the four still remain, the Butler Mansion, The Metcalfe House which is next to the Butler Mansion on North Street and the Pratt House which lies directly to the north of the Butler Mansion, on Delaware Ave. The root mansion which stood on the southwest corner of Delaware Ave. and North St. was torn down to make way for the present Howard Johnson's. The Building is basically unchanged as Mrs. Butler lived in the house until 1976 when it was sold to Roswell

Buffalo City Atlas, 1894, 1915  
Whitney's Biographical Dictionary of Architects, p. 374  
Landmark Society profile of Birge House

THEME: Residential-Georgian Revival Style

20. Unique styled house in city of Buffalo. Modeled on a French Riviera Villa. The architect was Arthur Little(1852-1925) of Little and Browne. He was senior partner in the firm and was primarily interested in early Colonial architecture and his best works were in the field of domestic arcitecture.

George L. Birge was the original owner. He was the son of Martin Birge, who began the family wall paper business in 1847. George Birge founded and was the head of the Pierce-Arrow Motor Car Company, and served on the Board of Directors for the Pan-American Exposition of 1901. The Birge's had formerly resided at 477 Delaware Avenue, a rowhouse. The Sisters of the Divine Child bought the property in 1938 who lived here until 1957 when the Buffalo Elks Lodge 23 bought it for their clubhouse. In 1974 Richard A. Vallone bought it and it has steadily deteriorated since then and is now threatened with demolition.

20. 245 North was built as the Girls' Central Branch of the YWCA. It is a unique Georgian Revival Styled building in the city because of its size and the monumental portico. Many unmarried women lived there as it was an appropriate place for them to live. It has since been used as a halfway house for troubled women. It is a fireproof construction except for the exposed steel in the attic. Concrete frame and floors. Roof of slate on gypsum slabs or exposed steel roof beams. Suspended ceiling of top floor forms floor of attic. Twelve inch brick and tile curtain walls. All interior walls are pyrobar or tile.

**20. Outstanding example of Queen Anne and Swiss Styling in Allentown due to large scale and the fine detailing. The original owner was George Williams, who was a banker at the Erie County Savings Bank and lived here from 1877 to 1896. He was a member of the Bflo. Historical Society and treasurer of the Pan-American Exposition Co. In 1897 he moved to 672 Delaware Ave. since that had become a more prestigious residential street. In 1899 he was elected president of the Bflo. Publiid Library for a four year term.**

DETAIL SHOT #110-20  
Roof  
267 North Street

18 cont'd scroll carving and terra cotta knob, panel below has scroll carving and house number carved, round arched openings along west side with keystones, bead molding and elaborately carved squared columns. Wood paneled double doors. West side has a round arched stained glass window, steep chimney stack and parapeted gable with terra cotta feline grotesque sitting at peak.

20. Unique and unusual house in Buffalo. The original owner was JN Bemis a prominent lumber dealer in the city. He previously lived at 414 Franklin and built his North Street home when he became more affluent. There are ten gas burning fireplaces with carved wood mantelpieces in the house and each room in the main section was done in a different type of wood including cherry and oak. In 1893 Joseph J. Jones moved to Buffalo and bought the house. He was born in Philadelphia on June 11, 1842. At the age of 19 he enlisted in the Civil War and was assigned to the 91st Pennsylvania Volunteer Infantry. At Cold Harbor he was wounded in both feet, injuries he never fully recovered from. Promoted to quarter master sergeant at Alexandria, Virginia. He later attained the ranks of Second Lieutenant, first lieutenant, and captain. At the close of the war he entered the oil fields of Pennsylvania and became one of the leaders of the oil industry. When he moved to Buffalo in 1893 he became president of the Niagara Gorge Railroad Company. His widow lived in the house after his death in 1916 until she died in 1920. Woodfrod Stewart, who was in the real estate business bought the house and owned it until the present owner, Philip Ransom, bought it in 1958. After the Pan American Exposition of 1901 closed, the Jones bought an arabian mosque that had been exhibited and installed in the second floor of the house at an estimated cost of \$20,000. It is believed that the Jones' used it as a card room when entertaining guests. The carriage house and caretakers cottage in the rear of the property were built around 1891. They are both two story frame with gable roofs and Stick Style in design. The sunporch at the rear of the house was added around 1920. A garage was added at the same time. The second floor guest quarters and third floor are now apartments with the main section as the owners residences.

17. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:

(Indicate if building or structure is in an historic district)

Among late Victorian homes, 1880-90 and middle class early 20th century homes. Richmond Avenue is a broad parkway that intersects with Symphony Circle. It is an excellent example of Frederick Law Olmsted's design of Buffalo's Public Park System.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

Two and a half story Colonial Revival Style. Hip roof. Front porch has semi-circular projection, fluted Ionic columns, rusticated stone base and dentils under cornice. Wood paneled door has leaded sidelights. Pilaster strips flank. Ancones support entablature door head. Dentils under cornice. Tripart windows on first floor have two over two light center window with double hung single light sidelights. Second floor has four part multi-light

19. DATE OF INITIAL CONSTRUCTION: \_\_\_\_\_

c. 1892

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

18 cont'd windows. Polygonal hip roofed dormer has pair windows, sixteen over one lights, flanked by rectangular multi-light windows. Left side has second floor bay window supported by brackets. Three large multi-light round arched windows. Engaged arcade in frieze. Hip roofed dormers on left side. Brackets support roof. Wood frame garage in rear of property c. 1905

20. Good example of the Colonial Revival Style as it was built in Buffalo, in the late 19th century. Richmond Avenue was the first street laid out by Frederick Law Olmstead for his city wide park plan. Mr. and Mrs. Pendennis White lived here in 1894. Mr. White was a lumberman in Tonawanda and New York City.

Religious

EMMANUEL TEMPLE: CHURCH OF THE PENTECOSTAL ASSEMBLIES OF THE WORLD

ARCHITECT: Frank Kent

Emmanuel Temple was originally built as Temple Bethel. The congregation began on May 9, 1847 when twelve Jews met in the Western Hotel at Pearl and Terrace Streets. It was the first Jewish congregation between New York City and Chicago. The first synagogue was on the top floor of the Hoyt Building, at Main and Eagle. A burial plot was purchased bounded by Fillmore, Gibson, Sycamore, and Broadway. On July 22, 1850, the congregation's second synagogue, a school at Pearl and Eagle, was bought remodeled. In January 1854 the congregation was bequest \$3000 by Judah Town who died in New Orleans. Tablets honoring his memory were made and have been moved to subsequent synagogues. In January 1865 fire and smoke from the burning American Hotel on Main Street, damaged the synagogue. However, the congregation was not able to afford a new synagogue for nine years. On August 15, 1874 the dedication of a new \$4000 synagogue on Elm between Eagle and North Division Street took place. Four years later the congregation took a radical step and allowed men and women to sit together at Sabbath services. Over thirty years later the Elm Street synagogue was sold and while the new synagogue was being built, services were held in the home of Joseph Saperston on Fargo Avenue.

The site for the new synagogue was chosen because members wanted it to be within walking distance of their East side homes. Members of the synagogue took a walk from the Elm Street synagogue and when they had walked forty minutes, to the Richmond Street site, they decided that, that would be the location for the new synagogue.

The cornerstone ceremony was July 24, 1910 and the Temple dedication took place on September 7, 1911. In 1926 the congregation dedicated its section in the Pine Hill Cemetery and a chapel was designed by Louis Greenstein. During World War II \$20,000 was spent for renovations to the auditorium, chapel, and temple center. In 1966 the congregation moved to Tonawanda.

Emanuel Temple of the Pentecostal Assemblies of the World Congregation began in 1939. In the church at 361 North Oak, former location of Annunciation Hellenic Orthodox Church, because of a planned expressway. Emmanuel Temple bought the Richmond Street synagogue and moved in during 1966.

17. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:  
 (Indicate if building or structure is in an historic district)

Among residential, commercial and recreational buildings of Elmwood Avenue, a busy street with many small businesses. Faces the Buffalo Tennis and Squash club.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

Two story Colonial Revival Style. Hip roof. Four stone chimney stacks. Three dormers across front. Middle dormer has scroll vergeboard, paired six over one light windows, doric pilasters, and dentiled eaves. Cornice below roof eaves has swag relief carvings, foliate carvings and dentils. First and second floors have windows with flat heads, single light, double hung sashes. First floor bay ~~significance~~ on south side. Front wood door has ~~small~~ window. (continue d)

19. DATE OF INITIAL CONSTRUCTION:

c. 1888

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

18. (continued) Narrow windows flank door. Front porch has entablature pediment, swag relief pattern and dentils in cornice, doric columns, and spindle balustrade. One story frame addition in rear.

20. Excellent example of the Colonial Revival Style. House is unique in that most houses built in this style were of wood or brick while this house is built of stone. Elmwood Ave. did not extend to Summer St. in 1834. Mr. and Mrs. William C. Warren lived here in 1892. Mr. Warren was with James P. Warren's Sons. He was publisher and proprietor of the Buffalo Commercial, located on Washington Street at North Division.

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

18 cont'd columns, cement balustrade with engaged arcade design with corbel stops.

20. House is unique in its gothic derived decoration. Mr. and Mrs. Nathaniel Rochester lived here in 1896. Nathaniel was born in Buffalo on March 26, 1853. He was the son of prominent physician Thomas F. Rochester. The Rochester family originally came from Virginia and its members are among the early settlers of Genesee County. Nathaniel took a course at Brvant and Stratton. He then began working at the Bank of Buffalo as a teller and moved up to teller. Upon the organization of the Third National Bank, Rochester became connected with it and soon rose to cashier, a position he held for 17 years. About 1902 he became president of the bank and continued until his death. He was treasurer of Trinity Church and of the Episcopal Diocese of Western NY. He was a member of the Sons of the Revolution. He was also interested in national guard affairs and in 1883 was lieutenant-colonel of the 65th regiment. Rochester died on March 6, 1906, his widow died on August 26, 1943.

 c. 1901  
 ARCHITECT: \_\_\_\_\_  
 BUILDER: \_\_\_\_\_
20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:  
 Good example of the Colonial Revival Style. Mr. and Mrs. Philip G. Schaefer lived here in 1901. Philip Schaefer was born in Buffalo on May 29, 1862. His father, Alois Schaefer who had come to Buffalo from Wurtemberg, Germany, established the Schaefer brewery in Buffalo in 1868. Alois Schaefer ran the brewery until 1885 when he retired. Philip Schaefer graduated from Canisius College in 1876. He also took courses at Bryant and Stratton, and then entered business as bookkeeper and collector for the Schaefer Brewing Co. until 1885 when the company merged with Lakeview Brewing Co. Philip Schaefer was the General Manager and acting executive head of the Lakeview Brewing Co. until 1906 when he became president of the company. He died in 1932.

Three story with French Styling. Mansard roof. Side segmental arched entrance has double wood paneled doors. Round window in second floor over entrance. Front facade has quoins. First floor french windows with transom and cast-iron balconies. Stone panels decorated with swags. Second floor has multi-light windows. Entablature. Round hooded dormers have pair multi-light windows.

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION: c. 1888

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

Excellent example of the French Country Style as it was built in Buffalo. Oakland Place was laid out in 1887 and was given its present name in 1888. The original owner was Herbert A. Meldrum, born in 1869 in Buffalo, he was the son of Alexander Meldrum, founder of AM&A's department store. In 1906 Herbert A. Meldrum brought Roy Knabenshue, a balloonist to Buffalo as publicity stunt for his business. Mr. Meldrum rode in the balloon over Buffalo taking the city's first aerial photographs.

Oakland Place is a one block street that houses some of the most unique and impressive styled buildings in the city of Buffalo. Commercial Elmwood Ave. lies one block to the west.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

Two and a half story Flemish Romanesque. Cross gable roof. Metal hood over main entrance. Wood paneled door with leaded sidelights and transom stone lintel. Tripart window to the right of entrance has double hung windows with transom and stone lintel. Two story bay window with flat roof. Double hung single light windows with transom, stone lintel and quoins at base of windows. Parapet. Small rectangular window on second floor over entrance. Stone

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION: \_\_\_\_\_

c. 1903

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

18 cont'd belt course separates second floor and gables. Pedimented gables have pair windows with stone lintel. Statuary at top of pediment and ends. Corbelled paneled chimneys.

20. Outstanding example of the Flemish Romanesque Style. Mr. and Mrs. John Allen Mann lived here from 1903 to 1949. John Allen Mann was born in 1857. After he went to school he became a book-keeper with the Free Trade Elevator Co. owned by his father. Shortly after joining the firm he became a partner. In 1882 he expanded his activities by building a Linseed oil plant. His brother George Mann later joined him in business. John remained president of that company until 1934 when it dissolved and he retired. The same year

Residential-Queen Anne Style

20. Outstanding example of large Queen Anne Style house in Buffalo. GL Lewis was the owner in 1891. Mr. and Mrs. George Lester Lewis lived here in 1892, along with Mrs. JB Sweet, Mrs. Lewis mother and Everett L. Sweet. Prior to 1892 they lived next door at 193 Summer. Nellie Sweet Lewis was born in Buffalo on November 11, 1862. She was the daughter of Phoebe Webster and Joseph Buffrin Sweet. She graduated from the Buffalo Seminary. On May 31, 1882 she married George L. Lewis. Mrs. Lewis was one of the first elected members of the Twentieth Century Club in 1894, the year the club was established. She was also a president of the Women's Parish Society of the Westminster Church. Mr. Lewis was a member of the law firm Lewis Moot, and Lewis at 14 Court Street. In 1908 the Lewis family moved to New York City where Mr. Lewis practiced law until his death in 1931. Mrs. Lewis died at age 90 on April 26, 1952 in Great Barrington, Mass.

211 Summer Street

20. Outstanding example of a large house with Romanesque Styling. Similar to 267 North Street. It has been converted to apartments. Mr. and Mrs. Spencer Kellogg lived here from 1887 to 1904, when they moved to 805 Delaware Avenue. Spencer Kellogg was born on June 16, 1851 in West Galaway, Montgomery County, New York. His parents were Lauren Kellogg, who died when Spencer was 2½ years old, and Elizabeth Miller who was a school teacher from Glasgow Scotland. In 1875 Spencer married Jane Morris of Amsterdam N.Y. After their marriage, they moved to Des Moines Iowa, but by 1879 they had moved to Buffalo. He founded the company of Kellogg and McDougal which later became Spencer Kellogg and Sons. The company was a direct descendant of his great grandfather, Supplina Kellogg's linseed oil business founded in 1824. Spencer's company was concerned with the manufacture of brooms, paints, and varnishes, white lead, iron and steel, oleomargarine and the operation of various grain elevators. Aside, from linseed oil, which was one of his more important interests, he produced castor oil, coconut oil, and had large refineries for the treating of various oils.

Mr. Kellogg was an anonymous (until his death) benefactor of the Institution for Character Education. He sponsored educational competitions for the best children's code of morals. He was very active in the little community church at Jerusalem Corners, near Derby, where he had a summer home for over thirty years.

Mr. Kellogg was a "family" man. He took great pride in his seven married children, eighteen grand children, and three great grandchildren, all of whom lived nearby in Buffalo. Mr. Kellogg died at age seventy-one on November 14, 1922.

20. Mr. and Mrs. Lyman Bass lived here in 1909. Mrs. Bass died in this house in 1960.

Lyman Metcalfe Bass was born in Buffalo. His parents were Lyman K. Bass and Frances E. Metcalfe, daughter of James H. Metcalfe. The family moved to Colorado Springs where Lyman attended school. In 1897 he graduated from Yale and in 1900 from Harvard Law School. In 1902 he entered the law office of Bissel, Carey and Cooke, the successor of a firm in which his father and Grover Cleveland were once partners. In 1904 he married Grace Holland. In 1906 he entered the firm. By 1950 the firm had adopted the name Kenefick, Bass, Letchworth, Blady and Phillips. Mr. Bass was US District Attorney for Western New York from 1906-1908, when he resigned to resume private practice. He fought in both the Spanish-American War and World War I. Mr. Lyman was interested in sports. Several times he was The Buffalo City Squash Racquette Champion. He was a member of the Boone and Crockett Club of New York City. He frequently hunted grizzly bear, mountain sheep and Rocky mountain goat in the west. He died at age 79 on July 9, 1955.

Grace Holland Bass was the daughter of Nelson and Susan Clark Holland. She was educated at the Buffalo Female Academy and Castle School on the Hudson. In 1904 she married Lyman M. Bass with whom she had three daughters. She served as a Red Cross Volunteer working during the War. She was a founder and member of the Garrett Club and a member of the Buffalo Country Club. She was a member of the Westminster Presbyterian Church from 1896 until her death on March 19, 1960.

(Indicate if building or structure is in an historic district)

Among large residences of Oakland Place, a one block street with prestigious homes built around 1900. Children's Hospital lies to the north on Bryant.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):  
Two and a half story with Styling. Gable roof. Pedimented front gable has four flat headed windows recessed in rounded arch. Modillions under pediment. Second floor windows are flat headed single light double hung. First floor has multi-light french doors with wrought iron balconets. Front wood paneled door recessed under porch with shingled posts.

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION: c. 1888

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

Good example of the merging of the Queen Anne and Colonial Revival Styles at the end of the 19th century. Oakland Place was cut through most virgin forest land in 1887, and in 1888 given its present name. Mr. and Mrs. George H. Sickes, Jr. lived here in 1892. George was involved in rear estate and had an office at 9 Niagara.

22. THEME:  
 Residential-Jacobethan Style

20. Excellent example of the Jacobethan Style. House was originally owned by Georgia MG Forman and was bought by the Catholic Diocese in 1952 (Dec. 22). The house is now the residence of Bishop Head. The Forman property is one of several estates in the Oakland-Bryant Delaware area that were acquired by the diocese including the former home of Wade Stevenson president of the Chamber of Commerce, on Bryant Street and the Charles W. Goodyear and Thomas B. Lockwood homes on Delaware Avenue. Georgia Forman was born in Lockport on April 5, 1871. She was brought to Buffalo by her parents in the 1880's and was educated at St. Margaret's, a former private school on North St. She married Howard A. Foreman in 1892. For more than a decade she served on the Board of Managers of Children's Hospital. Georgia Forman was a contributor to the Room of Contemporary Art at the Albright Art Gallery-presenting it in 1940 with a Sixth Dynasty Limestone Buddhist statue of a winged lion (Chimera). Georgia Forman died at age 85 on 6/24/1955.

Residential-Georgian Revival

20. Excellent example of the Georgian Revival Style. Grace Millard Knox moved here in 1924 from home at 806 Delaware, (118-36) where she had lived for six years. The two houses were originally part of the same lot with the expansive rear yard used by both residences. Grace Millard was the daughter of Charles A. and Sarah Avery Millard of Port Chester. Later the family moved to Ionia, Michigan and then to Detroit, where Grace married Seymour H. Knox on June 11, 1890. Mr. Knox was one of the founders of the FW Woolworth Company and Chairman of the Marine National Bank of the time of his death in 1915. Grace and Seymour had four children: Dorothy, Virginia, Seymour H., Marjorie and Grace Millard who died in infancy. Mrs. Knox loved to travel. She visited many European and Oriental countries. Mrs. Knox was widely known as a philanthropist. A few of the institutions which benefited by substantial donations were: University of Buffalo, Buffalo Museum of Science, Albright-Knox, Goodyear Convalescent Home, Home for the Friendless, Children's Hospital, Millard Fillmore Hospital, and Joint Charities.

22. THEME:  
Residential-Tudor Styling

20. Tudor Style facade was probably a later addition. At one time the home of Ganson Depew, who was born in Buffalo, NY. March 6, 1866. He was the son of William B. and Helen Ganson Depew. He attended local schools and graduated Central High School. Entered law offices of Greene, McMillan, Gluck and Pooley in 1884. Three years later admitted to bar. 1889 he became a member of the firm and continued legal practice until 1902. He withdrew to become associated with his father-in-law. Frank H. Goodyear, in the administration of huge coal, lumber and railroad projects in Penn. Appointed counsel Buffalo and Susquehanna Railroad, later he was president of the Goodyear Lumber Co. and the Buffalo and Susquehanna Coal Co. Also the director of Great Southern Lumber and the Erie County Savings Bank. He was Kentucky Colonel on the staff of Governor, Ruby Laffon, admiral in Kentucky Navy. Locally he was known as "the father of Golf". He laid out the first nine-hole golf course in the city. In 1921 he became president of Buffalo District Golf Association.

From 1884-1890 champion tennis player in the territory between Buffalo Syracuse and Toronto. 1903 winner of international tennis tournament in Switzerland. He was the originators of the movement in Buffalo to coordinate the businessman's groups and taxpayers organizations, which were striving for a lower tax rate. The movement grew into information of the United Taxpayers League, Inc.

Some of his hobbies included slide collecting over 6,000 in collection. Member of Buffalo Microscopical Society and a fellow of the Royal Microscopical Society of London, England.

His brother, the late Chauncey Mitchell Depew was United States consul at Palermo. Governor Lehman appointed Depew a member of the Erie County Survey Commission. At time of death serving second term as president of Buffalo of Commerce. Chamber of Commerce proclaimed Depew "Buffalo's No. 1 Citizen". He was an honorary member of the Society of the Cincinnati, the aristocrat of all patriotic societies. Mr. and Mrs. John Bush lived here in 1883. Mrs. Myron P. Bush owned the house in 1891.

- THEME:  
Residential-Jacobethan

20. Excellent example of the Jacobethan Style. Summer Street along with North Street and Delaware Avenue, became a prestigious residential street in the late 19th century. Walter Platt Cooke was the original owner. After WWI he was delegated to Paris as a US citizen member of the Reparations Commission under the Dawes plan. He was President of the London Arbitration board set up in the Young plan for reparations settlements.

Every one of the five cases that came up during Mr. Cooke's tenure was settled by unanimous agreement. In 1926 he was elected to the Reparations Commission and served 20 months. He was made officer of Legion of Honor by France. He was made an officer in the Order of Leopold by the King of Belgium and also made an officer in the Order of Saints Maurice Lazare by Italy. Cooke served as Chancellor of the University of Buffalo from 1920 until Capen became Chancellor. In 1926 he was given the Chancellor Norton Medal for distinguished community service.

He was associated with the directorship of Marine Midland, Marine Trust, Great Southern Lumber, Pierce Arrow Motor Car Co., Seneca Amusement Co., Buffalo Niagara and Eastern Power Co., Pratt and Lambert Inc., NY Telephone Co., and Lake Erie Trading Corp.

He was president of the NY State Bar Association and the Erie County Bar Association. He had two children. Katherine Porter and Carlton P. Cooke.

THEME:

Tudor-Residential

20. Excellent example of Tudor Style. Delaware Avenue became Buffalo's most prestigious street in the late 19th century with many large residences being built on the street until the 1920's. Since then many of the houses have been torn down for office and apartment buildings, while others have been adapted for institutional or commercial use. Carolyn Jewett Tripp Clement lived here in 1910.

Carolyn Jewett Tripp was born in Buffalo July 19, 1861. Mrs. Clement was the daughter of Mr. and Mrs. Augustus Tripp. Her father a prominent businessman, was the original partner of Sidney Sheppard in the firm of Sidney Sheppard & Co., now known as the Republican Metalware Company.

Mrs. Clement was graduated from the State Normal School, now the Buffalo State Teachers College, and then spent a year in Europe studying piano and traveling.

An accomplished musician, she played the harp and organ as the piano. She always was deeply interested in gardening and travel. On March 27, 1884 she was married to Mr. Clement, a man who achieved great eminence in community affairs, not only through his banking interests, but through his devotion to educational, charitable religious and industrial affairs. She and Mr. Clement had six children. He died March 26, 1913, the day before their 29th wedding anniversary and before the Delaware Avenue residence was completed.

Probably the institution closest to Mrs. Clement's heart was Westminister Church, of which she had been a member of for 67 years. She always was active in social work in Westminister Committee House, the center in Monroe St. maintained by the church, and twice she served as president of the Women's Parish Society. She also generously supported Westminister Hospital in Iran.

In 1914 she and her family gave the land for Westminister Church's parish house. In the same year she endowed the Chair of Christian Methods in Yale University's School of Religion. In memory of her daughter she opened a summer camp for under privileged children at Angola in 1918 and called it the Marion Clement Tener Vacation House.

Mrs. Clement contributed a total of \$80,000 to the University of Buffalo, in addition to gifts made by her family. She gave \$50,000 in the 1920 endowment campaign, \$5,000 to the building fund for Edmund Hayes Hall in 1926 and \$25,000 in the 1929 endowment campaign.

Mrs. Clement was in the first group of women elected to the Council of the University of Buffalo. For 21 years Mrs. Clement took an active interest in university affairs, serving especially on the Buildings and Grounds Committee.

Mrs. Clement also was member of the local board of the State Teachers College, was a trustee of the Buffalo General Hospital and a past president of the Twentieth Century Club. In WW I she was active in the Liberty Loan campaigns.

Her most notable contribution to the community was the gift of her palatial home at 786 Delaware Avenue to the American Red Cross in June 1941. Erected

in 1910 at a cost of \$300,000, the home was the scene of many important social functions and the gathering place of leaders in the city's life for 30 years. Its Tudor architecture permitted such unusual features as a 1½ story music room, with organ; interior walls of limestone, and a garage heating plant connected to the house by a 4-foot tunnel. The home has become the Red Cross Chapter House and center of its myriad activities.

22. THEME:

Residential-Italian Renaissance

20. Excellent example of the Italian Renaissance Style. Delaware Avenue became Buffalo's most prestigious street in the late 19th century with many large residences being built on the street until the 1920's. Since then many of the houses have been torn down for office and apartment buildings while others have been adapted for institutional or commercial use. Mrs. Seymour H. Knox lived here in 1917 to 1923, when she moved to 57 Oakland which is directly behind this house. At one time the backyards of the two houses were landscaped as one. Mrs. Knox, the former Grace Millard of Detroit, met her husband-who at the time of his death in 1915 was vice-president of the Woolworth Co., and chairman of the board of the Marine Trust Co.-when he came to Buffalo on a vacation trip with a party of girls. They married in 1890. Grace Knox was about 54 when her husband died on the eve of the start of the new house. They were living at 1035 Delaware Avenue.

The entrance at 806 Delaware Avenue, as in many Buffalo houses, is at the side, to the north, and is covered by a handsome porte-cochere. A wide porch traverses the front and a marble terrace, with steps leading down to the lawn, opens out from the drawing and dining rooms. Glass door with ornamental wrought iron open on a foyer, where matching doors lead to the marble hall. The house includes 25 rooms proper, excluding kitchen, pantries, baths, cloakrooms, wardrobe and maintenance quarters. 23X30 ft. front hall and marble staircase with French ornamental bronze balustrade and bronze hand-rail. The walnut paneled library with an Italian Renaissance stone mantel faces the staircase. The music room has a white marble mantel. The Rotunda a Pompeian-type smaller dining area, is circled with rose-tan marble pillars and pilasters, the floor of inlaid marble in four tones of beige and tan. The ceiling is painted in a neoclassic design, predominantly in tones of blue and rose. A niche holds a marble fountain and above it a Tiffany glass panel about 4 ft. square of a peacock in full spread is lit from behind. The master bedroom bath is walled and appointed in white marble veined in black and gold. Master bedrooms have moldings, chair rails and mantels in the style of Louis XVI. Eight servants bedrooms are situated in the north wing, which is split at the second floor level to accommodate them. A 32X81 ft. ballroom, billard room and maintenance quarters are in the cellar. Built before air-conditioning, the ballroom has its own special cooling system. Heat for the house was piped from the garage at the rear to assure cleanliness. Requirements were from one to two tons of coal a day.

2. In 1920 the Montefiore Club bought the Knox mansion. They hired the architectural firm of the Milstein, Whick, Davis and Hamilton to remodel the house into a private club. By 1978 the club was unable to keep up the expenses need to maintain the mansion, and the bank foreclosed the mortgage. The bank sold the property to Computer Task Group for estimated \$1million. The company converted the ballroom into a computer center, the rest of the house being used for office space.

22. THEME:  
Residential-Italian Renaissance

20. Excellent example of the Italian Renaissance Style. Delaware Avenue became Buffalo's most prestigious street in the late 19th century with many large residences being built on the street until the 1920's. Since then many of the houses have been torn down for office and apartment buildings while others have been adapted for institutional or commercial use. Mrs. Seymour H. Knox lived here in 1917 to 1923, when she moved to 57 Oakland which is directly behind this house. At one time the backyards of the two houses were landscaped as one. Mrs. Knox, the former Grace Millard of Detroit, met her husband-who at the time of his death in 1915 was vice-president of the Woolworth Co., and chairman of the board of the Marine Trust Co.-when he came to Buffalo on a vacation trip with a party of girls. They married in 1890. Grace Knox was about 54 when her husband died on the eve of the start of the new house. They were living at 1035 Delaware Avenue.

The entrance at 806 Delaware Avenue, as in many Buffalo houses, is at the side, to the north, and is covered by a handsome porte-cochere. A wide porch traverses the front and a marble terrace, with steps leading down to the lawn, opens out from the drawing and dining rooms. Glass door with ornamental wrought iron open on a foyer, where matching doors lead to the marble hall. The house includes 25 rooms proper, excluding kitchen, pantries, baths, cloakrooms, wardrobe and maintenance quarters. 23X30 ft. front hall and marble staircase with French ornamental bronze balustrade and bronze hand-rail. The walnut paneled library with an Italian Renaissance stone mantel faces the staircase. The music room has a white marble mantel. The Rotunda a Pompeian-type smaller dining area, is circled with rose-tan marble pillars and pilasters, the floor of inlaid marble in four tones of beige and tan. The ceiling is painted in a neoclassic design, predominantly in tones of blue and rose. A niche holds a marble fountain and above it a Tiffany glass panel about 4 ft. square of a peacock in full spread is lit from behind. The master bedroom bath is walled and appointed in white marble veined in black and gold. Master bedrooms have moldings, chair rails and mantels in the style of Louis XVI. Eight servants bedrooms are situated in the north wing, which is split at the second floor level to accommodate them. A 32X81 ft. ballroom, billard room and maintenance quarters are in the cellar. Buffalo Evening News, 10/11/22  
Buffalo City Atlas, 1891, 1894
22. THEME:  
Residential-Greek Revival

20. Excellent example of the Greek Revival Style as it was built around the turn of the century. Delaware Avenue became the city's most prestigious streets at the end of the 19th century thus most of the city's largest residences can be found on this street. The original owner was George V. Foreman, an early oil magnate. He was born near Milford, NJ. 1841. After graduating from Princeton in 1861 he practiced law in Trenton, NY. Later he moved to Oil City, PA. where with Capt. JJ Vandergrift he established the Oil City Trust Co. Mr. Foreman was president for a time, while a resident in Olean he being a member of the Board of the Exchange National Bank of Olean, organized the Easter Oil Co. incorporated in West Virginia. He then came to Buffalo to be president of the company.

In 1893 he founded Fidelity Trust Co., which he stayed associated with until 1910. He also supported the WNY home for the protection of homeless and dependent children at Randolph.

George V. Foreman sold the mansion to Oliver Cabana Jr. shortly after it was built. Cabana was born in Island Pond, Vermont in 1865 of French Canadian parents. At 14 he came to Buffalo where he took a business course at Bryant and Stratton. At 20 he organized the Buffalo Specialty Company, makers of household articles. Cabana prospered and established two factories in Buffalo, also in Canada, England and Germany. Sales went into the millions and the name was changed to the Liquid Veneer Company. Cabana became the official head of all the industries with which he was connected. He developed the Wright-Hargreaves Gold Mine in Kirkland Lake, Ontario. He was chairman of Liberty Bank of Buffalo, and was responsible for its building. He developed the Sun Diet Health Foundation, in East Aurora, and wrote books on health. In cooperation with Dr. Joseph Burke, he built and developed Central Park Hospital. He assisted in the development of Canisius College. He managed the campaign for Gov. Alfred E. Smith in Buffalo and Erie County in 1928. He was permanent chairman of the Democratic State Convention and was the director of the following institutions: Bflo. Foundation, American Forestry Assoc., Niagara Frontier Planning Assoc., National Reivers and Harbors Congress, Qesur Oil Corp. and Bflo. Municipal Research Bureau. In addition, he bred, developed and drove race horses in Elma and breed Holstein cattle. He was in commission of the State Reservation at Niagara, vice chairman of the State Board of Housing. Cabana twice declined mayoral nomination and was twice presidential elector.

On the first floor there is a formal stairhall which is lighted by two large clear leaded glass windows. The second floor has eight bedrooms, each with a fireplace, and five baths with marble wainscoat and mosaic tile. There is a leaded glass ornamental window over the front entranceway portico. The third floor has skylight.

In the rear of 824 Delaware is yellow brick 2½ story carriage house with a center carriage entrance and two symmetrical semi-circular stair towers to either side. It has a copper roof and an added firewall running through its center. The first floor has five rooms, a lobby, a gym. Storage and heating room and two separate entrance, one leading to a gym and the other to the remodeled classroom area. The materials on the first floor include concrete floors, stairs to the basement of stone, walls of granite and classroom walls of gypsum.
